- Git & GitHub
- Firebase
- Figma
- Miro

Language

- Hebrew - Nativ
- English - Full Professional Proficiency

Shahar Ashkenazi

Technical Project Manager

Technical Project Manager with a B.Sc. in Information Systems, experienced in leading end-to-end software projects, managing cross-functional teams, and integrating AI-driven workflows using Claude Code, Cursor, and ChatGPT to accelerate delivery and improve project execution.

Experience

Target Systems | Oct 2024 - Present

Technical Project Manager

- Grew the platform's enterprise client base from 1 to 7, scaling 15 to 445+ active superusers and 85 to 2,300+ active users on the system.
- Leverage AI tools such as Claude Code, Cursor, and ChatGPT to accelerate product discovery, technical planning, specification writing, prototyping, and software delivery.
- Lead a cross-functional team of 5 developers, managing Sprint planning, backlog prioritization, and delivery execution using Jira.
- Own end-to-end software project delivery from requirements gathering and technical specifications through QA, deployment, and production release.
- Serve as the primary technical focal point between business and R&D, driving system integrations, technical decision-making, and delivery alignment.

Comax ERP | Jun. 2021 - Jun. 2022

Project Manager

- Led client discovery sessions, analyzed business requirements, and translated them into functional requirements and implementation plans for ERP projects.
- Managed customer implementation processes, coordinating between clients and cross-functional teams to ensure successful project delivery.

Projects

HeadUp | Technical Product Manager

Cherry Seed Entrepreneurship Program (Reichman University)

Nov 2025 - Mar 2026

- Defined the product strategy and built an Android MVP using Kotlin.
- Leveraged AI tools (Claude Code, Cursor, and ChatGPT) throughout product discovery, development, and iteration to accelerate MVP delivery.
- Utilized data-driven validation and market analysis to drive business development and product iteration.

Carvertise | Location-Based Advertising App

Personal Project | 2025

- Developed complex geolocation logic to dynamically match real-time GPS data with targeted ad placement.
- Integrated backend JSON data structures to optimize dynamic, location-based content delivery and system logic.
- Leveraged AI tools to accelerate prototyping, implementation, and feature validation.

Military Service

Duvdevan Unit | 2016-2019

Commando Squad Commander | Duvdevan 217 & Mobility Unit 5515

- Led a team of 25 soldiers in operational and high-pressure environments.
- Led team operations and decision-making under pressure.
- Prepared and managed teams for complex missions.
- Developed strong leadership, responsibility and problem-solving skills.
