Shahar Ashkenazi

Product Manager | Technical Project Manager

Technical Product Manager & Developer with a B.Sc. in Information Systems, experienced in leading cross-functional teams and owning end-to-end product delivery. Skilled in translating business needs into data-driven PRDs, bridging R&D and business goals. A collaborative communicator, highly adaptable and driven to innovate.

Experience

Target Systems | Oct 2024 - Present

Technical Product Manager

- Own end-to-end product delivery throughout the product lifecycle, managing Agile execution from requirements to QA and deployment.
- Lead and collaborate with a cross-functional team of 5 developers, fostering strong team dynamics, and facilitating Sprint planning and backlog grooming using Jira.
- Translate business and operational needs into scalable product features, technical solutions, and system architecture.
- Serve as the primary focal point for R&D on technical problem-solving, system integrations, and data architecture decisions to ensure seamless alignment.
- Author comprehensive, data-driven PRDs and technical specifications, defining product logic and key metrics for feature success.

Comax ERP | Jun. 2021 - Jun. 2022

Sales Engineer

- Analyzed client business needs and translated them into tailored ERP solutions for retail organizations.
- Led product demonstrations and worked directly with clients to align software capabilities with operational workflows.

Projects

HeadUp | Product & Project Lead

Cherry Seed Entrepreneurship Program (Reichman University)

Nov 2025 – Mar 2026

- Defined the product strategy and built an Android MVP using Kotlin with sensor-based detection.
- Executed user research and early validation to define core functionality and UX architecture.
- Utilized data-driven validation and market analysis to drive business development and product iteration.

Carvertise | Location-Based Advertising App

Personal Project | 2025

- Developed complex geolocation logic to dynamically match real-time GPS data with targeted ad placement.
- Integrated backend JSON data structures to optimize dynamic, location-based content delivery and system logic.
- Designed the end-to-end user journey, focusing on interactive features, real-time updates, and user engagement metrics.

Military Service

Duvdevan Unit | 2016-2019

Commando Squad Commander | Duvdevan 217 & Mobility Unit 5515

- Active Reserve Service in the Mobility Unit**
- Led a team of 25 soldiers in operational and high-pressure environments.
- Led team operations and decision-making under pressure.
- Prepared and managed teams for complex missions.
- Developed strong leadership, responsibility and problem-solving skills.
